What we will cover

- What is Margin Master?
- How to use Margin Master to export and import inventory price updates
- How to contact Margin Master

Integration with Margin Master

What is Margin Master?

“Margin Master is a computer program designed to help retailers achieve incremental gains to their bottom line by enabling them to quickly analyze their current retails. Their retail can be quickly changed to provide unlimited "What-If" scenarios. Also, an analysis can be performed against known Competitor Pricing Information. The value of Margin Master really shines when the retailer is able to quickly perform these "what-if" scenarios, and see very quickly the impact a proposed retail change has to their bottom line - both on an annual basis and a month by month basis.”

Integration with Margin Master

How to export a Margin Master file from Paladin Point of Sale

1. Open Paladin Point of Sale.
2. On the **Maintain** menu, click **Data Viewer**.
3. In the **Paladin POS Data Viewer** window, click the **Margin Master** tab.
4. In the **Export Inventory Prices** pane, in the **Supplier** list, select the supplier whose prices you want to update.
5. Click the gray box next to **Filename**
6. In the **File** name list, browse to the location on your computer where you want to save the file, and then click **Open**.
7. In the **Margin Master** window, click **Export**.
8. In the Successful Export window, click **OK**.

Integration with Margin Master

How to import a Margin Master file into Paladin Point of Sale

1. Open the **Margin Master** file that you saved, make changes, and then save the file.
2. On the **Maintain** menu, click **Data Viewer**.
3. In the **Paladin POS Data Viewer** window, click the **Margin Master** tab.
4. In the **Import Inventory Prices** pane, click the gray box to the right of **Filename**.
5. In the **File name** list, browse to the location on your computer where you want to save the file, and then click **Open**.
6. In the **Import Inventory Prices** pane, click **Import**.
7. In the **Successful Import** window, you will see a message about how many prices were updated.
8. Click **OK**.
